

BRIGHT TV VIEWERSHIP ANALYTICS

Presenter: Ndivhuwo Netshiendeulu

Date 19 April 2026

Contents

1. Introduction
2. Data Systems
3. Analysis
4. Recommendations
5. Q&A

Introduction

- Bright TV is a media company where TV viewers subscribe to view different channel contents.
- The CEO wants to grow the company's subscription base for this financial year.
- I am tasked to analyse 4 months historical data consisting of user profiles and viewership, in-order to understand Bright TV's viewership trends.

Aim

- The aim of this project is to extract insights from the data and provide support to the Customer Value Management (CVM) team.

Data Systems

- **Project Planning**

- Miro for project planning (analysis process planning and process flow diagram)
- Canva for project planning (project timeline on Gantt Chart)

- **Data Processing**

- Databricks (SQL)

- **Data Visualisation**

- Microsoft Excel for Data Visualisation and Dashboard creation
- Google Looker Studio/ Data Studio for Dashboard creation
- Lovable AI for Dashboard creation

- **Presentation**

- Microsoft PowerPoint
- CANVA AI for presentation

Analysis

Total Channels: 21

Top 10 No. of Views by Channel

	Channels	No. of Views ▾
1.	Supersport Live Events	1,636
2.	ICC Cricket World Cup 2011	1,465
3.	Channel O	1,050
4.	Trace TV	949
5.	SuperSport Blitz	895
6.	Africa Magic	859
7.	Cartoon Network	792
8.	Boomerang	713
9.	CNN	504
10.	E! Entertainment	367

Insights

- The total number of TV views is 10.0K over the 4 months period.
- There are 21 TV channels.
- The most viewed channels are sports (Supersport Live Events with 1636 views) and ICC Cricket World Cup 2011 with 1465 views), followed by music (Channel O with 1050 views).

Analysis

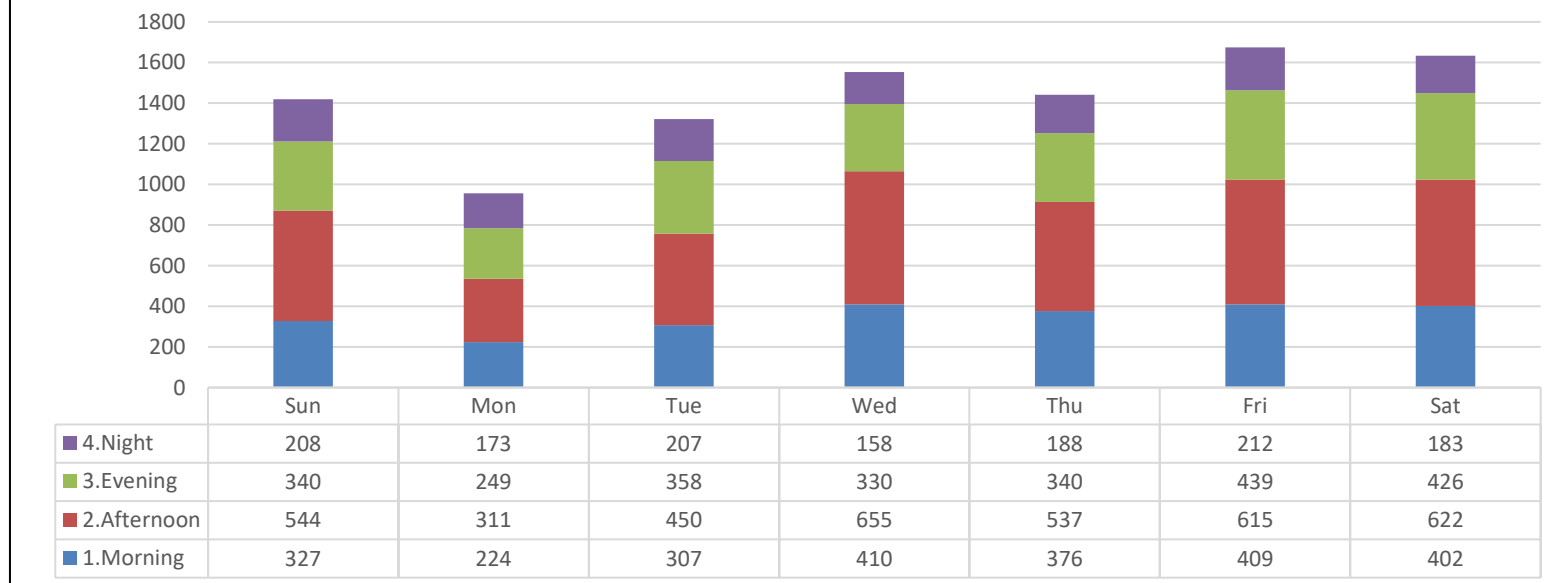

No. of Views by Record Date

Insights

- There is an upward trend in the number of views from January (2199) which peaks in March (4816).
- Friday (1675) is the highest consumption day of the week, followed by Saturday (1633) and Wednesday (1553).
- Monday (957) is the lowest consumption day of the week.
- Afternoon (3734) is the most popular time to view TV, followed by the evening (2482), while night (1329) is the least popular time to view TV.

Number of Views by Day Name and time buckets

Analysis

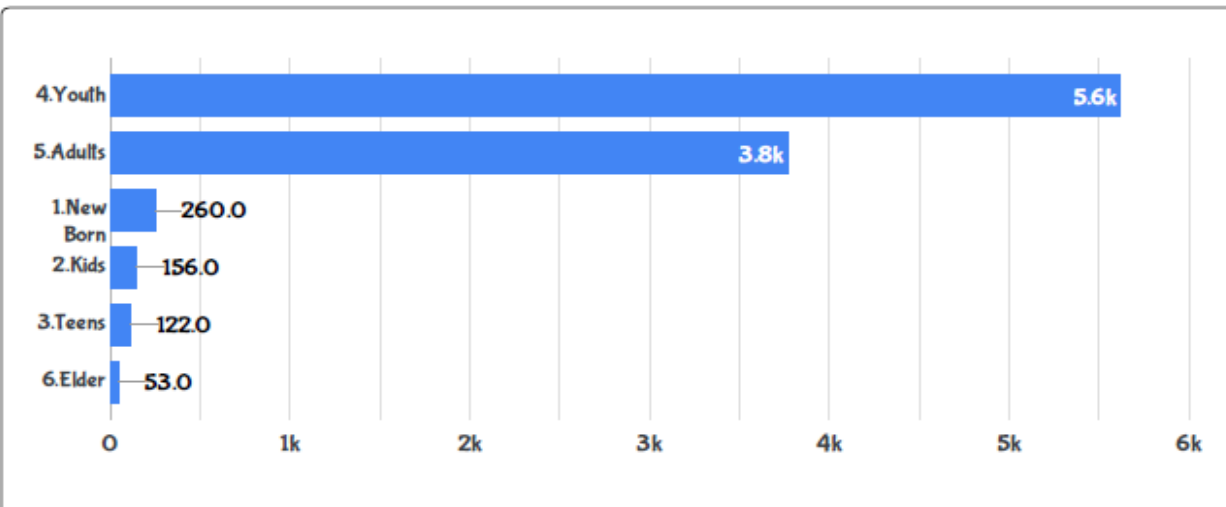

Insights

- The male gender has the highest views (8752), while female have low views (976).
- It is hard to classify the None gender category because they did not provide enough information.
- The Youth have the largest number of TV views (5.6K), followed by adults (3.8K), while elders (53) are the lowest number of TV viewers.

No. of Views by Gender

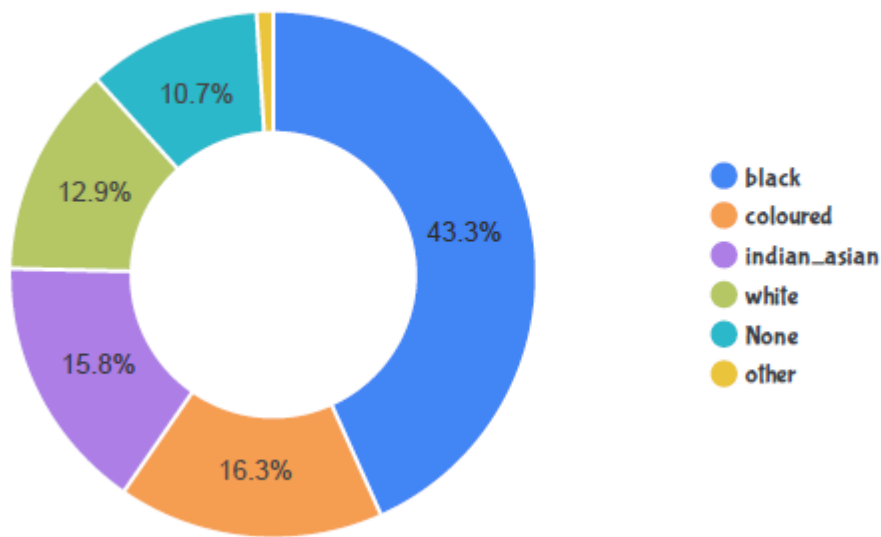

No. of Views by Age Buckets

Analysis

Distribution of Views by Race

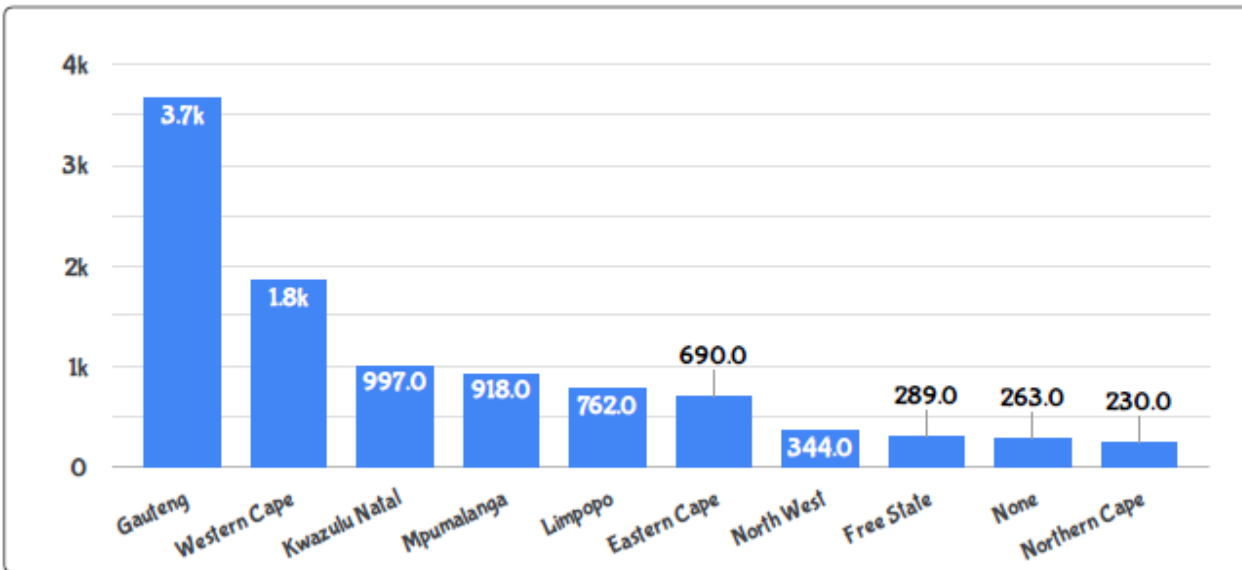

Insights

- The Black Race (43.3%) is the majority TV viewer, followed by Coloured (16.3%) and Indian_Asian (15.8%), while the White Race has a low (12.9%) viewership
- The None category did not provide information about their Race, so it is not possible to classify them
- While the Other Race category maybe they do not fall within the specified categories

Analysis

No. of Views by Province

Insights

- Gauteng has the largest number of TV views (3.7K), followed by Western Cape (1.8K), and KwaZulu Natal (997.0).
- Free State (289.0) and Northern Cape (230.0) have lower number of views.
- The None category did not specify their exact province location

Recommendations

- Show content with high number of viewers such as: Supersport Live Events, ICC Cricket World Cup 2011, Channel 0 and Trace TV, to attract more youth and teen viewers on days with low TV consumption (e.g. Monday), to increase viewership.
- Grow the number of female viewers by showing content that appeals to females e.g. E!Entertainment and African Magic.
- Focus on growing viewership in provinces like the Northern Cape and Free State through location specific promotions.
- Show more shows that can attract white viewers, maybe Afrikaans language content.
- In the afternoon focus on kids friendly content such as Cartoon Network and Boomerang, to increase the number of kids viewers.
- Do not neglect your most loyal viewers including provinces with high views, the youth and adults, the black race and Friday- the highest TV consumption day.
